

Hello,

I've heard that you are a particularly curious and creative class, who love to bamboozle your teacher with impossible questions. My new book is inspired by children just like YOU! It's full of your curious conundrums:

- Why are bubbles always round?
- Are cats liquid or solid?
- What's the opposite of a spider?
- Why do we need eyebrows?
- Could I swim in ice cream?

[Click here to watch this postcard as a video!](#)

Do you have an even funnier, even more impossible question bubbling away in your brain? Send me your class's best questions and you could win a virtual assembly (where I'll answer your question LIVE for your whole school) AND a copy of the book!

Good luck - and stay curious!

Isabel Thomas
