

Make your own peppered moth

Salt and pepper moth

1. Paint clear water all over the moth.
2. Add some dots of black paint.
3. Sprinkle on salt and pepper. Small piles of salt work well!
4. Let the moth dry. Tape a stick onto the back.
5. Add pipe cleaner antennae.

Charcoal moth

1. Open up the template. Rest it on a rough surface (bark is good).
2. Rub all over the moth with charcoal.
3. Turn the moth over. Tape a stick on to one half.
4. Fold the other half over the stick. Tape it in place.
5. Add pipe cleaner antennae.

Moth

An Evolution Story
