

### Make a pet phage

1. Cut a cardboard drinking straw in half.
2. Coil a long chenille straw around the straw.
3. Cut a second chenille straw in half.

4. Fold each half into a zig zag. Push the centre of each zig zag into one end of the straw to create four 'legs'.
5. Assemble the dodecahedron below. Make a small hole and push the 3D shape on to the other end of the straw.
